PRISM Precipitation: A New NEON/CTSM Data Stream

customizeCase_PRISM.ipyr tking@ip-10-0-0-145:~ x +

Markdown v Bash O

Customize your case: PRISM precipitation

We set up a special way to run_neon with PRISM precipitation data.

This is an optional tutorial; it's a little bit more advanced, but it will help you think about how to modify the model configuration to run new sites or model experiments.

The run_neon script we used in the [introductory tutorial 1b](#) created and ran a base case as well as a . transient case. Here we'll also be adding an experimental . PRISM. transient case that reads in an alternative precipitation dataset from PRISM.
